

COOPER WARRANTY

Congratulations on upgrading to Cooper tyres, tyres worth owning! You're covered for up to **80,000 kilometres** of driving. For drivers who look after their gear, it means real value over time, fewer replacements, and confidence that the tyres will go the distance.

Cooper Tires are engineered with more tread depth than standard brands. This helps reduce wear, maintain grip over time, and deliver strong value across every kilometre. The deeper tread is a key reason many drivers report long-lasting performance, with some sets reaching well beyond 80,000 kilometres.

COOPER MILEAGE WARRANTY

Most Cooper tyres are guaranteed to last from 50,000 – 80,000km (depending on size and tread pattern) or 72 months (based on date of purchase) whichever comes first. Mud tyres (STT PRO) do not come with specific mileage guarantees, however, the life expectancy of these tyres should be greater compared to many other competitor brands under the same conditions.

The Mileage Warranty is a pro-rata warranty. The amount covered will be determined by multiplying the consumer's original purchase price by the percentage of the kilometre shortfall. The kilometre shortfall is the difference between the kilometres guaranteed and the kilometres achieved. You are responsible for all costs associated with making a claim under this warranty including the cost of fitting, balancing and any additional charges or your acceptance of a higher priced replacement tyre.

The regular care and maintenance of your wheel alignment, brakes, suspension and wheels are crucial to the performance and wear of your Cooper tyres; for this reason, you must return your vehicle to a TyreZim branch each 10,000km for an inspection of these items.

During each inspection, TyreZim will perform a free diagnosis to establish whether a tyre service is required. If a tyre service is not required, the branch will sign your service card at no cost. If a tyre service is required, a charge will apply for this. Your warranty is subject to this as well as the correction of any fault found in your vehicle which may affect tyre wear.

COOPER MANUFACTURER'S WARRANTY

Your Cooper tyres are also guaranteed against manufacturing faults for a period of **72 months** from date of purchase or for the tread life (tread worn to 1.6mm - shown by tread wear indicators moulded into the tread grooves) of the tyre, whichever is earlier.

Cooper Tires will remedy defects in materials and workmanship by paying the cost of replacing the tyre on a pro-rata basis (calculated by multiplying your original purchase price by the percentage of original tread depth remaining on the tyre). You are responsible for all costs associated with making a claim under this warranty including the cost of fitting, balancing and any additional charges or your acceptance of a higher priced replacement tyre.

Neither the manufacturer's nor the mileage warranty covers product defects caused by factors beyond the control of the manufacturer such as:

- Tyres that become unserviceable due to conditions resulting from road hazards, such as cuts, snags or punctures.
- Conditions resulting from improper installation, wheel misalignment or tyre/wheel assembly imbalance.
- Conditions resulting from consumer damage, such as improper tyre and vehicle maintenance, misuse, abuse and accident.
- Passenger car tyres used in any commercial application (including taxi or hire vehicles).

To claim under a Warranty, you must have proof of purchase and a completed warranty card.

This warranty is given by the manufacturer, Cooper Tires, and its distributors TyreZim (Pvt) Ltd.
